Full Stack Developer

We're looking for a developer with a positive mindset who shares our purpose, values and ethos. Wanna help us change the world?

We are looking for a Full Stack Developer who can take responsibility for developing and designing front end web architecture, ensure the responsiveness of applications and work alongside graphic designers for web design features, among other duties. They will be required to see out a project from conception to final product which requires good organisational skills and attention to detail.

About Truzo™

We're passionate about stamping out fraud, scams and corruption.

Truzo™ was established out of a deep desire to ensure buyers and sellers aren't scammed and to spur economic growth in Africa. Our independent Escrow Payment Platform enables buyers and sellers to transact anywhere, any time via any device, in a safe and secure way.

Truzo™ is an international business with offices in Joburg and London and is not only registered with the Payments Association of South Africa (PASA) but is also an Authorised Financial Services Provider (FSP 51539), regulated by the Financial Sector Conduct Authority.

Why Work For Us

Truzo™ is a fast growing and dynamic FinTech start-up

Truzo is made up of a small team of likeminded individuals, who are experts in their field. We operate with integrity and believe in open communication, diversity and fostering a healthy, happy work environment. We are deeply passionate about investments back into the South Africa and Africa, creating a more stable economy, one transaction at a time.

We continuously strive to enhance our Truzo™ platform, innovate and disrupt the industry that we play in and always look for ways to improve the lives of our customers and staff and are committed to providing relevant, efficient, secure and affordable services.

In staying at the forefront of innovation in our industry sector, we use the latest technologies and innovations; combining, re-inventing and implementing them to the benefit of all Truzo™ users. Our aim is to provide a ubiquitous payment solution that is used by the majority of companies and households in South Africa, Africa and the rest of the world.

Our Ethos – Innovation, Integrity and Investment back into South Africa and Africa.

Role Summary

Are you a highly skilled computer programmer who is comfortable with both front and back end programming? Then we'd love to meet you!

This role is for the South African office of Truzo™ and will involve supporting, enhancing and innovating the current Truzo™ platform as part of the Truzo™ development team.

You'll be part of a cross-functional team that is responsible for the full software development lifecycle, from conception to deployment and support. As a Full Stack Developer, you should be

comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.

Being familiar with Agile methodologies and DevOps is a big plus.

Responsibilities

- Developing front end website architecture.
- Designing user interactions on web pages.
- Developing back end for website applications.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- Working alongside graphic designers for web design features.
- Seeing through a project from conception to finished product.
- Designing and developing RESTful APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in web applications and programming languages.

Requirements

- Minimum of 3 years experience as a Full Stack Developer.
- Degree in Computer Science.
- Strong organizational and project management skills.
- Proficiency with fundamental front end languages such as HTML, CSS and JavaScript.
- Familiarity with JavaScript frameworks such as Angular JS, React, VueJS and Amber.
- Proficiency with server side languages and RESTful API frameworks such as Express for JavaScript on Node.js and Flask for Python.

- Familiarity with SQL database technology such as MySQL, Oracle, as well as document-based databases such as MongoDB.
- Familiarity with Docker and Kubernetes, as well as cloud platforms such as AWS, GCP or Azure.
- Familiarity with Git source control and Git-based repositories such as GitHub, GitLab or BitBucket.
- Familiarity with mobile technologies such as PhoneGap, Cordova or Flutter will be advantageous.
- Excellent verbal communication skills.
- Good problem solving skills.
- Attention to detail.

Tech Stack

- HTML with JavaScript, CSS and Bootstrap.
- VueJS and Vue CLI.
- JavaScript with Express on Node.js, Python with Flask.
- RabbitMQ.
- Redis.
- PostgreSQL and MongoDB.
- Docker and Kubernetes.

Please send your CV / details to andrei@truzo.com.
